|---|---|
| **Manufacturer:** | Greggersen |
| **Product Number:** | 903510 |

## Description

Filter Panel Size 1 Vacuum

Duplex bacterial filter stage
up to 65 $m^3/h$ vacuum

To protect the vacuum vessel and pumps against
contamination by micro-organisms and foreign particles
as well as for filtering the drawn-in exhaust air.

For use in a medical vacuum supply
system in accordance with DIN EN ISO 7396-1.

Redundant design of the filter stage. This allows filter
replacement during maintenance work without interrupting the
vacuum supply.

Scope of delivery consists of:
4 ball valves 1"
2 bacterial filters with attached secretion jar

1 wall-mounting plate 1100 x 150mm (WxH) and pipe clamps

for pipe support

Connecting and linking pipes copper pipe 28mm

Technical data:

Capacity: 65 $m^3/h$

Dimensions: 1150 x 900 x 150mm (WxHxD) incl. filter

Connection: Copper pipe Ø 28x1.5mm

Efficiency: 99.99% at 0.01µ

Weight approx.: 20 kg
